

LIFE Program

Powerful Ways to Improve Recovery and Survival

A growing body of medical research is confirming that integrated cancer care is as important as the treatments you take.

InspireHealth's **LIFE Program** is a unique two-day program led by InspireHealth's medical doctors, practitioners and staff.

You will learn all aspects of supporting recovery and survival through immune system support, nutrition, exercise, emotional and spiritual support, supplements, and complementary therapies.

These are all safely integrated with your conventional cancer treatments by your InspireHealth physician.

"This program was exactly what I needed. It truly inspired me at the deepest level. Thanks for teaching from the heart with factual and profound research."

-LIFE Program Participant
